## Description

Experience the serenity of sustainable luxury aboard the groundbreaking CLC115, a tri-deck superyacht that redefines modern life on the water. Designed for the discerning yachtsman, she seamlessly unites visionary design, exceptional comfort, and advanced efficiency into one extraordinary platform.

Crafted through a collaboration between leading naval architects INCAT Crowther and structural engineers Gurit, the CLC115 represents a new benchmark in contemporary yacht design. Her advanced GRP resin-infusion construction delivers remarkable strength, efficiency, and precision, culminating in a 35-metre catamaran hull engineered for superior performance and stability.

Step inside to discover a world where panoramic wraparound windows dissolve the boundary between interior and ocean, flooding every space with natural light and uninterrupted views. The result is an atmosphere of openness, calm, and connection to the sea.

At the heart of the yacht lies a visionary beach club, designed as a true waterside sanctuary where yacht and seascape become one. Whether relaxing on expansive sunpads, enjoying the aft lounge, or unwinding in the foredeck jacuzzi, every space has been carefully curated for relaxation, entertainment, and immersion in the marine environment.

The sun-drenched salon offers a sophisticated social hub, complete with elegant lounge seating, a sleek bar, and a formal dining area designed for unforgettable moments. Expansive outdoor decks provide multiple environments for alfresco dining and entertaining, ensuring every occasion is framed by breathtaking ocean vistas.

Accommodation is equally refined, with an opulent full-beam owner's suite offering exceptional privacy and comfort on the main deck, complemented by a beautifully appointed en-suite guest stateroom. The mid deck features four additional en-suite guest cabins, each crafted as a private sanctuary of comfort and tranquillity for family and guests.

Engineered with sustainability at its core, the CLC115 incorporates optional hybrid propulsion, integrated solar technology, and intelligent energy management systems through a smart onboard control module. Certified to RINA Yacht Class standards, she is powered by twin MAN V8-1300 diesel engines or optional hybrid propulsion, delivering a projected top speed of 18 knots with smooth, efficient cruising performance.

More than a superyacht, the CLC115 is a statement of intent, where innovation, environmental responsibility, and refined luxury converge. With her striking profile, advanced engineering, and thoughtful liveability, she sets a new standard for the future of responsible yachting.

For further information, please contact the Sydney Marine Brokerage team today—we look forward to introducing you to the remarkable CLC115.
