Grand Soleil Blue

POA

Specifications

Boat Details

Price	POA	Boat Brand	Grand Soleil
Model	Blue	Length	9.99
Year	2024	Category	Cruiser / Racer
Hull Style	Single	Hull Type	GRP
Power Type	Sail	Stock Number	NSB23
Condition	New	State	New South Wales
Suburb	NEWPORT	Engine Make	Electric

Disclaimer

Our company offers the details of this vessel in good faith but cannot guarantee or warrant the accuracy of this information nor warrant the condition of the vessel. A buyer should instruct his agents and/or surveyors to investigate such details buyer desires validated. This vessel is offered subject to prior sale, price change or withdrawal without notice.

Description

Blue is much more than a yacht, she is step towards a greener and more sustainable future.

With already 3 units sold this incredible yacht has been masterfully designed by Multiple world champion designer Matteo Polli and internally by Nauta Design.

This yacht represents a new chapter in the history of boating where sustainability, efficiency and design come together to create a "bluer" future at sea. This principle has been the guiding force shaping every facet of the design process. The outcome is a remarkably innovative and stylish weekender, capable of hosting up to four guests overnight, boasting both zero environmental impact during sailing and completely recyclable at the culmination of its life cycle. How this has been achieved? By pursuing several groundbreaking design and construction methodologies:

- 1. Sustainable construction:** The GS Blue marks a turning point in boat construction by employing thermoplastic resin, a choice that addresses one of the most significant problems in the marine sector: end-of-life recycling. Traditionally, composite boats have been built using thermosetting resins, which are very difficult if not impossible to recycle. Thermoplastic resin, on the other hand, allows for easier separation of the resin and glass or carbon fibers for re-use or eco-responsible disposal.
- 2. Design for disassembly:** A smart design approach allows easy separation of boat accessories and components, similar to end-of-life practices in the automotive industry. This critical process ensures that every part of the GS Blue can be effectively disassembled and recycled, minimizing environmental impact.
- 3. Electric propulsion:** The GS Blue will feature a lithium battery bank and electric propulsion for zero-emission navigation, contributing to a more sustainable future by reducing emissions.
- 4. Solar panels:** The installation of solar panels provides renewable energy autonomy by recharging the battery bank feeding the electric motor. The GS Blue will have an impressive autonomy, with the standard battery pack enabling a range of 30 nautical miles at approximately 5 knots, translating to 6 hours of continuous engine operation or 12 hours with the dual battery pack.
- 5. Thermoplastic sails:** Aligning with the project's sustainable philosophy, the sails are crafted from thermoplastic materials, underscoring the commitment to minimizing environmental impact.
- 6. Hydro-generation:** During sailing, the GS Blue skillfully recharging its batteries as the propeller spins in response to the water flow generated by the boat's speed.

Blue will be launched at the 2024 Cannes yachting festival and we invite you to contact our team today to discuss this incredible opportunity and learn more about our sustainable future with Grand Soleil Yachts.

Features

Designer

Matteo Polli / Nauta Design

Builder

Grand Soleil Yachts

Hull Construction Material

Thermoplastic Resin / GRP / Carbon

Hull Type	Monohull
Deck Construction Material	Thermoplastic Resin / GRP / Carbon
Country Origin	Italy
Length (feet)	33
Length (m)	9.99
Beam/Width (feet)	12
Beam/Width (m)	3.70
Draft (m)	2.20m / 1.80m (Opt)
Displacement	3,300kg
Engine Notes	Electric
Number of Batteries	Lithium
Accommodation Notes	Open Planned
Sail Inventory	Thermoplastic Sails

Engine Details

Engine Make	Electric
